The three pie charts represent the frequency of internet use:

- Never:** A pie chart divided into four equal quadrants of red, blue, yellow, and green, representing 25% for each category.
- Sometimes:** A pie chart divided vertically into two equal halves of red and orange, representing 50% for each category.
- Often:** A pie chart divided into three unequal parts: a red sector (approximately 40%), a blue sector (approximately 35%), and a yellow sector (approximately 25%).
